

Greenside School

Annual Assessment Statement

2017-2018

Please see Greenside's Assessment Policy for details of our assessment system.

PIVATS Results:

PIVATS results are captured and analysed in May. A summary of the results are:

PIVAT Judgement	EYFS	KS1	KS2	KS3	KS4	Post 16
Above Expected						
Expected						
Below Expected						

The above averages are for each Key Stage – further detail can be found in the PIVATS Progress report. From reflection it was felt that with 28% of learners presenting with PMLD and 25% presenting with ASD as a primary need. PIVATS focus areas are not relevant and challenging to show progress within.

EHCP Outcomes Progress:

This year has been the start of a new focus on tracking the progress made of learning progressing towards meeting their EHCP outcomes. Judgements are made 3 times a year. The summary below is taken relating to progress in the Key Stages, to allow comparisons to be made:

EHCP Judgement	EYFS	KS1	KS2	KS3	KS4	Post 16
Achieved outcome						
Working towards						
No progress						

Also it should be noted, 65% of the school were judged as achieving over the year. Further detail can be found on an individual basis through the Evidence for Learning Application

Summary:

Our EHCP progress data is showing a positive trend and will improve as regular judgements are captured. PIVATS data highlights that either not enough progress has been made in most cases or the tool is not fit for purpose. Our termly Learner Progress meetings will explore this on an individualised basis.

Alongside the judgements inputted into the 'Evidence for Learning' app, each has a rich and varied learning journey that shows the small and detailed steps to gaining progress for our learners.

Next Steps:

As a School our aims for next year are:

- To review the summative assessment tool used for PMLD and ASD learners
- To increase the rate of progress of those learners using PIVATS to over 40% achieving Above Expected
- To share regularly progress to parents through the app and allow parents to contribute evidence
- To improve the quality of evidence found on the app
